## Residential Pricing Schedule: May 2023

	Assessment Type	Total Price:
Single storey	6 Star	\$343
	Deemed to Satisfy	\$320
Double Storey	6 Star	\$373
	Deemed to Satisfy	\$340

### Other Work

We'll provide quotations for any scope of work or consultation that falls outside of the above table. This includes unit developments and apartments, BASIX reports and commercial projects.

[Email for quotation](#)

### Revisions

Charges will be proportionate to the amount of additional work undertaken for the revision. We tend to charge \$80 per additional hour spent, plus any new NatHERS certificate fees required. However, if it takes a couple of minutes we won't charge for our time. We'll also advise you of any revision costs ahead of time.

### 7-Star Design Seminars

To prepare designers, architects and builders to adapt to the new energy efficiency provisions in 2022 National Construction Code Volume 2, we've been running training seminars on 7-Star design principles. If you'd like to strengthen your grasp on thermal design and NCC requirements, please register your interest in an online or in-person training session.

### Turn-around time

Our standard turnaround time is within 2-3 business days, however for urgent work we may be able to provide same day service - just let us know!

### Disclaimer

These prices are to be viewed as a general guide for budgeting purposes. We reserve the right to vary our prices at our discretion (and at times, in your favour!), so please speak to us for a formal arrangement or quotation.
